DETAILED ACTION

This Office Action is in response to the Amendment filed on September 27, 2004.

Claims 1-2 and 8 were amended; and claim 10 was cancelled.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: None of the cited prior art alone or in combination teaches the claimed combination of a rotary internal combustion engine having a center wall between the compression chamber and ignition chamber, and a shaft being concentrically disposed and extending through the compression chamber, ignition chamber, and the center wall, including:

Regarding claim 1:

the compression chamber having an oval shape and a first rotor therein creating a first and second arcuate compression compartment zones; and timed ignition elements in communication with the arcuate compression compartment zones.

Regarding claim 8:

a pair of oppositely disposed vanes slidably mounted in radially extended slots in each of the rotors so that rotation of the rotors will cause outer ends of the vanes to engage the surfaces of the oval-shaped chamber walls to vary the space on opposite sides of the vanes as they move through the arcuate compression compartment zones when the rotors are rotating; and fuel injection ports adjacent the vanes on the rotor in the compression chamber for permitting the flow of fuel from the perimeter of the first rotor to a surface thereof adjacent the center section."

Conclusion

The IDS (PTO-1449) filed on June 09, 2004 has been considered. An initialized copy is attached hereto.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
